German	A1	B1	A1	A1	A1

Levels: A1/2: Basic user - B1/2: Independent user - C1/2 Proficient user

Driving license: B

Communication skills

It has been always very easy for me to meet and communicate with new people from different places of all around the world. We used to have a mechanic shop and I was always dealing with costumers, so I am good at dealing with different kind of people and working with local vendors.

I have also worked in an international volunteering organization in university for 2 years with many volunteers from all around Europe. We were doing some activities together with local, and refugee's kids, and some environmental activities. So I am good at working in a team with different kind of people.

Technical Skills and Competences:

My father is an electrical mechanic, and I grow up in a mechanic shop as a mechanic too. I am really good at repairing electrical machines (Cooling systems, refrigerators, air conditioners, wash machines etc.), solving technical problems and finding suitable practical ways to solve problems. Also thanks to my department, I have learnt how to approach a problem systematically and how to find a convenient solution.

Computer Skills and Competences:

Since I am an engineer I am quite good user of computer. C++, C#, AutoCAD, MS Office, Mat lab, and PSpice are some programs that I have used to work on.
